

Appaloosa Pedigree Recognition Registry (APR)

On the 1st August 2012 the AAA Ltd introduced an additional registry to recognise Appaloosa horses that carry a minimum of 7/8ths Appaloosa breeding.

This registration concept is not only to celebrate the use of majority Appaloosa breeding, but to promote the use of both coloured and solid horses in the breeding program rather than continual use of outcrossing which dilutes the appaloosa characteristic.

The use of solid coloured Appaloosas in a breeding program can be very beneficial, which will become more obvious as we learn more about the Appaloosa gene.

There are 2 sections to the APR Registry, APR1 and APR2. APR1 eligible horses must have a minimum 15/16ths Appaloosa Breeding. APR2 eligible horses must have a minimum 7/8ths Appaloosa Breeding.

So, how do you know if your horse is eligible?

Finding out is as simple as checking your horses' pedigree.

Firstly, your horse must be registered with the AAA Ltd in one of the regular registries.

Eligibility for the APR1 Registry requires 15 of the 16 horses listed in the 5th generation of your horses' pedigree to be Registered Appaloosas.

Eligibility for the APR2 Registry requires 7 of the 8 horses listed in the 4th generation of your horses' pedigree to be Registered Appaloosas.

Now you know your horse is eligible, so how do you actually get the horse APR Registered?

For horses applying for registration, all you need to do is tick the appropriate box on the newly amended Application for Registration form, supply a 5 generation pedigree as proof of eligibility and the fee of \$33.00. Please note these requirements are in addition to the normal registration process.

For horses that are already registered, there is an Application for APR Registration form available on the AAA Ltd Website. Complete this form and return it with a 5 generation pedigree as proof of eligibility, your horses existing Registration Card and \$33.00.
